

# Portfolio Website

T1A2

Gisele Lima - 04/03/2022

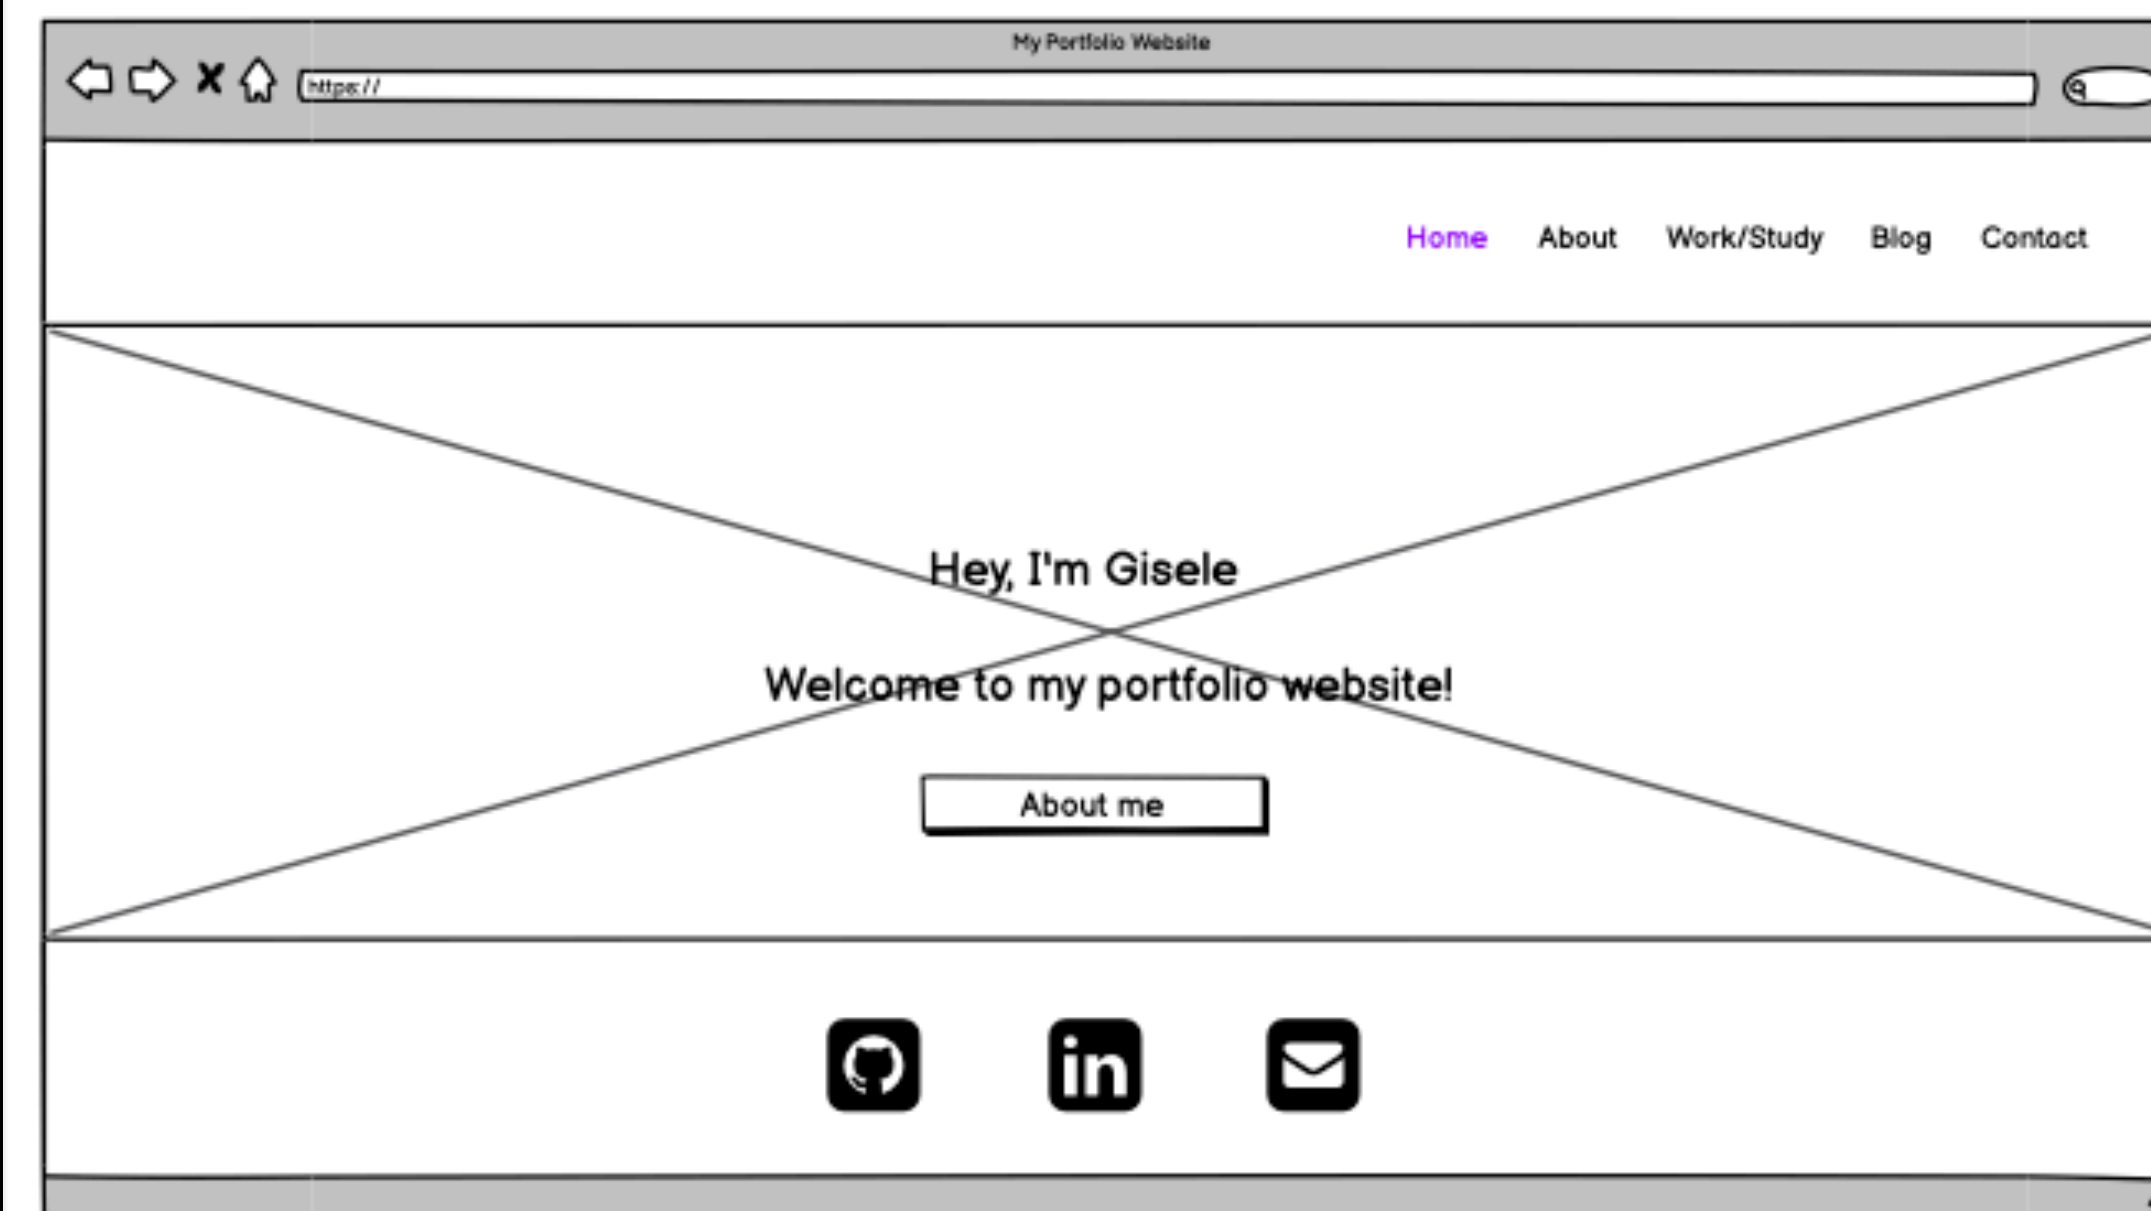

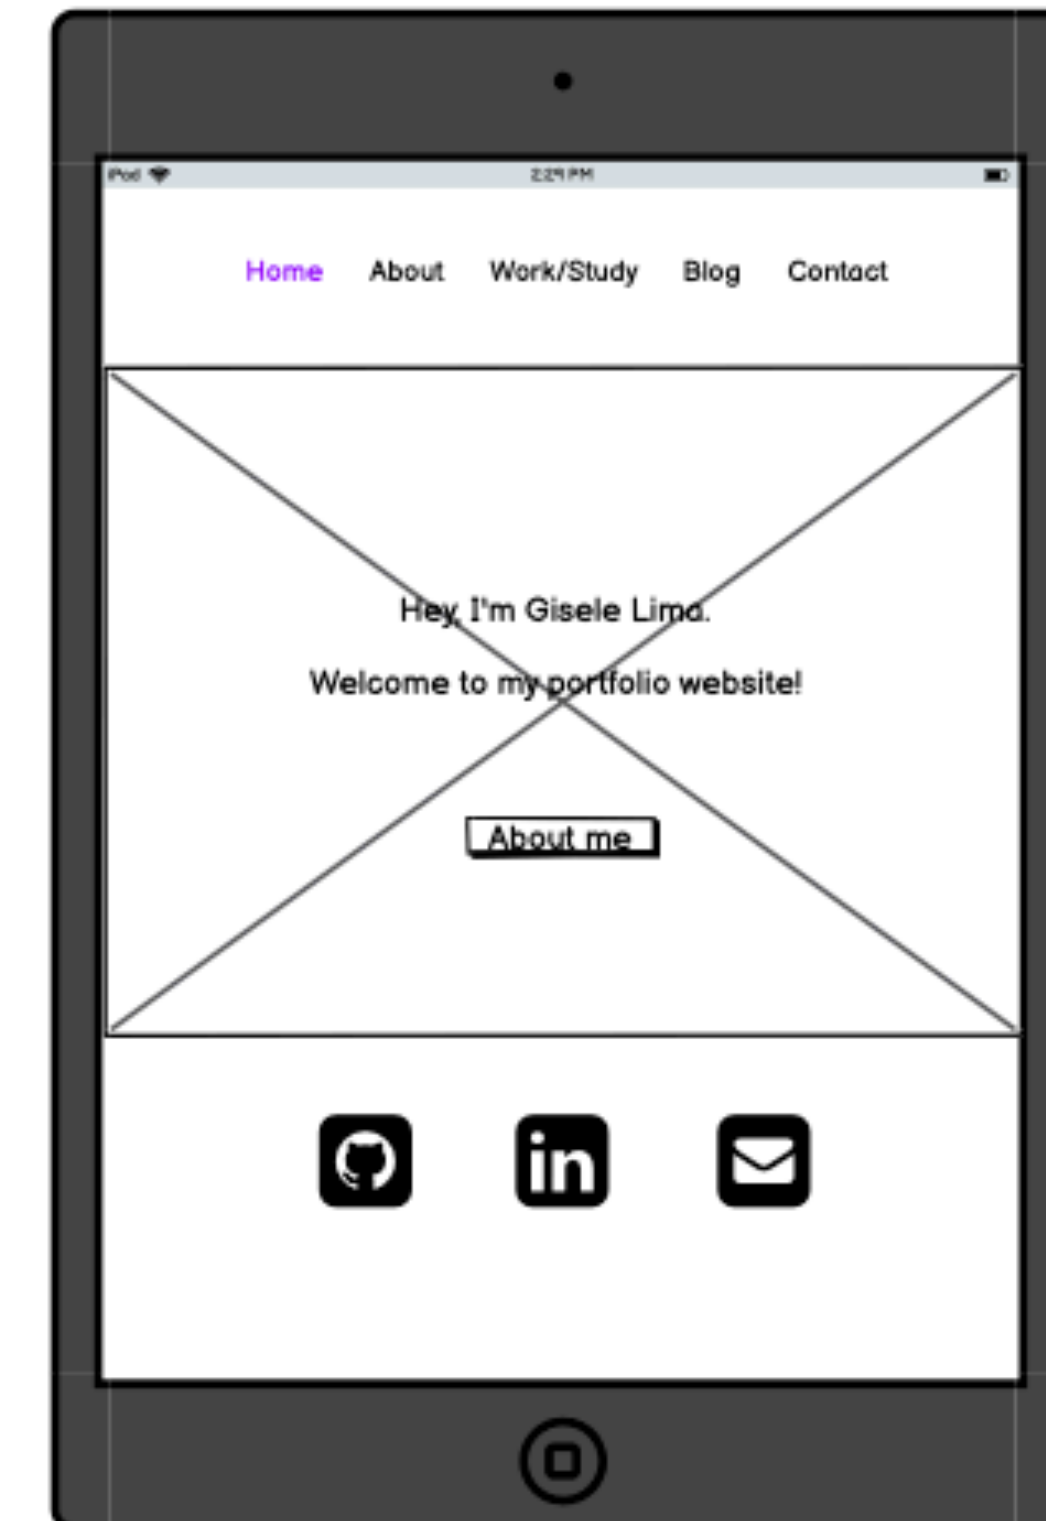

# Step 1

## Define Sitemap

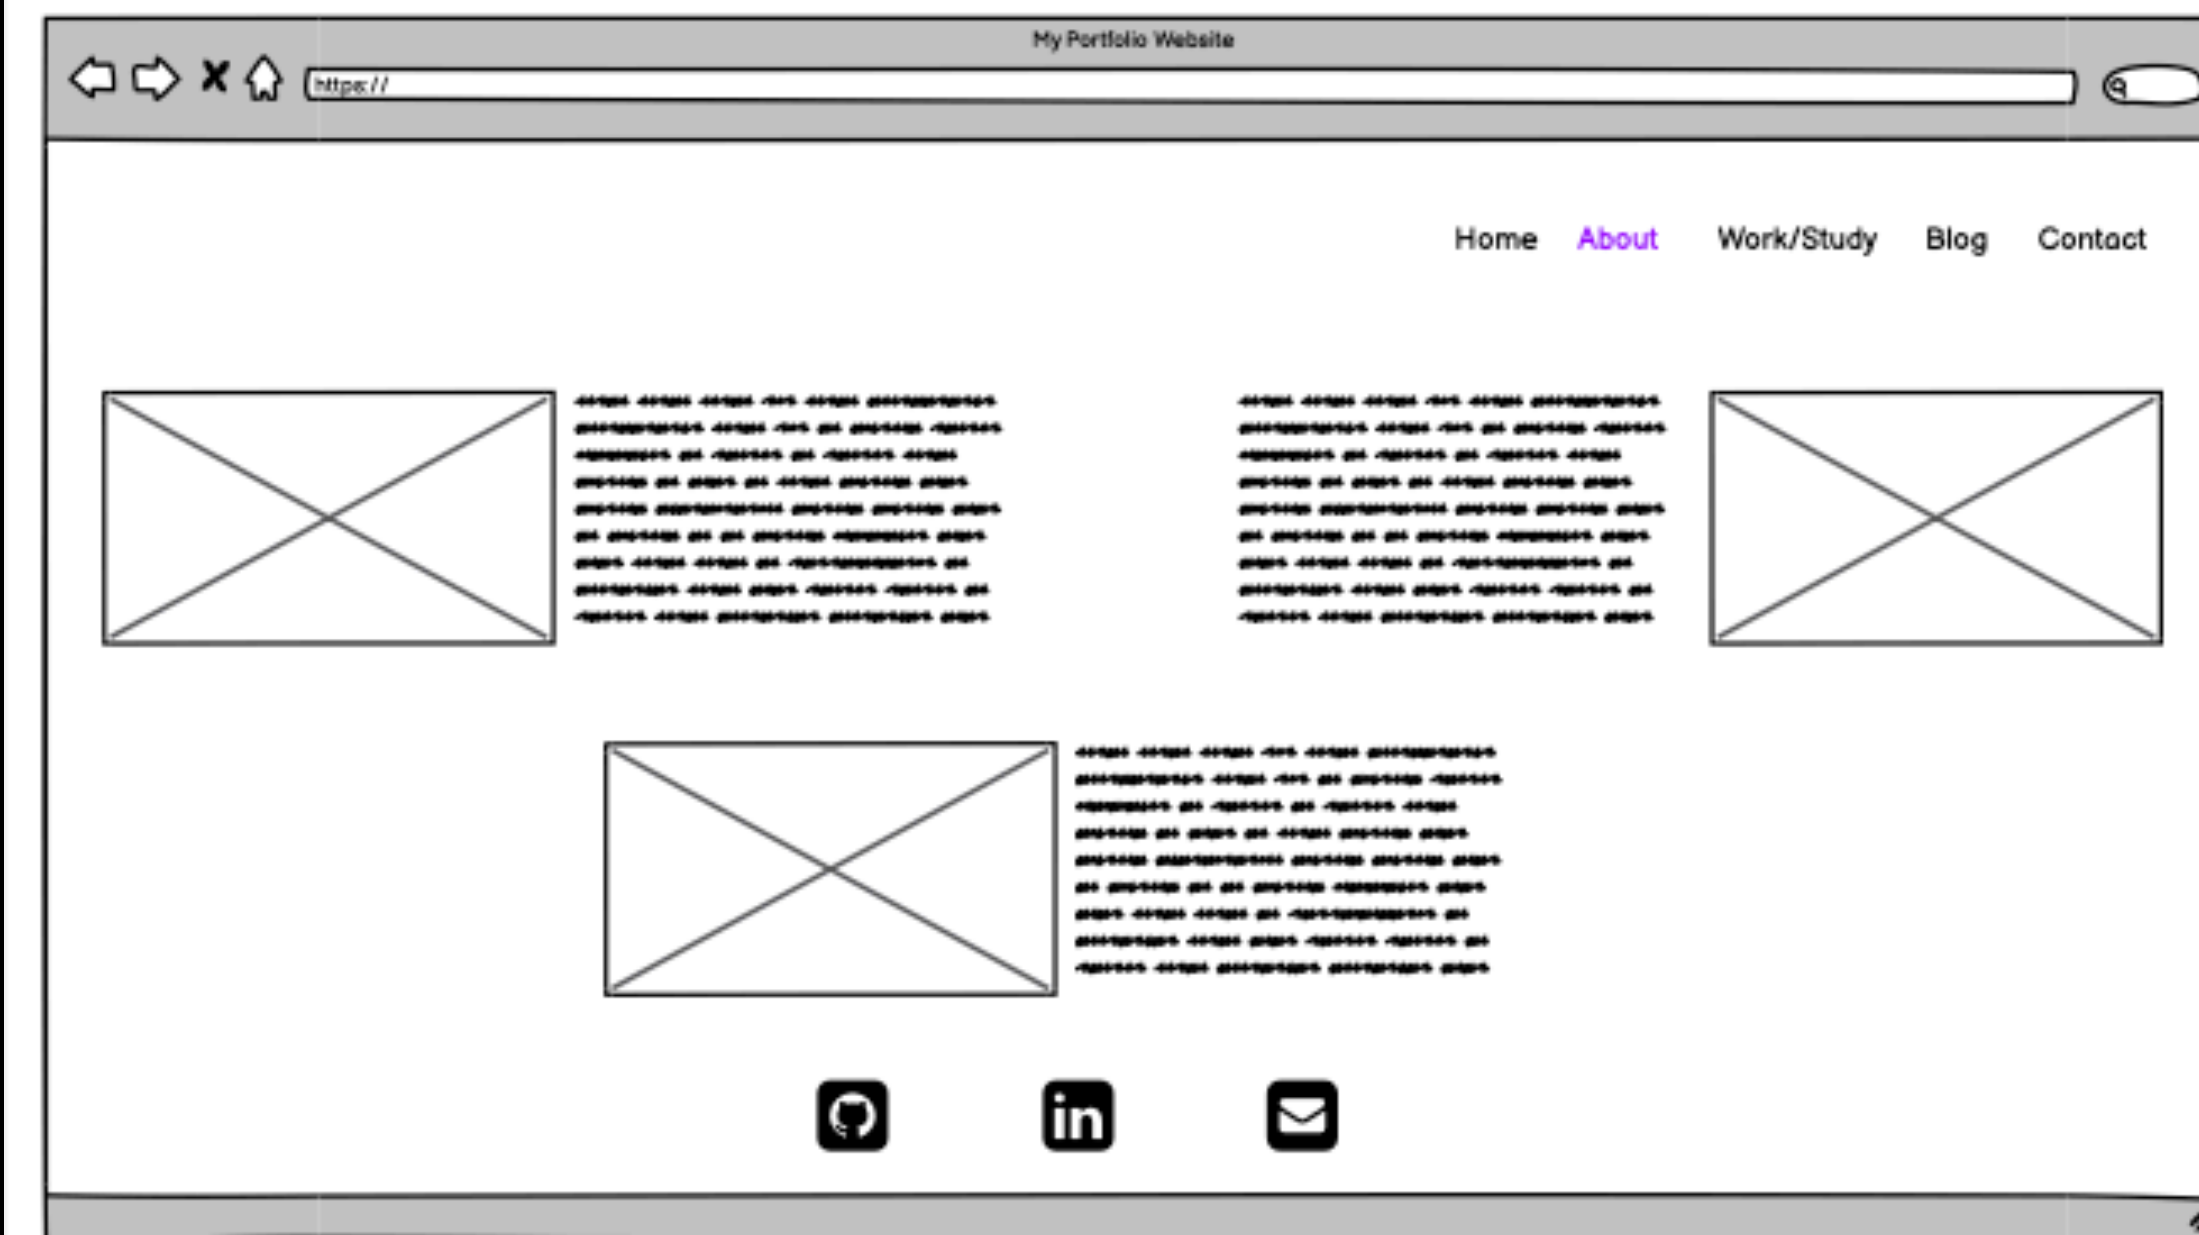

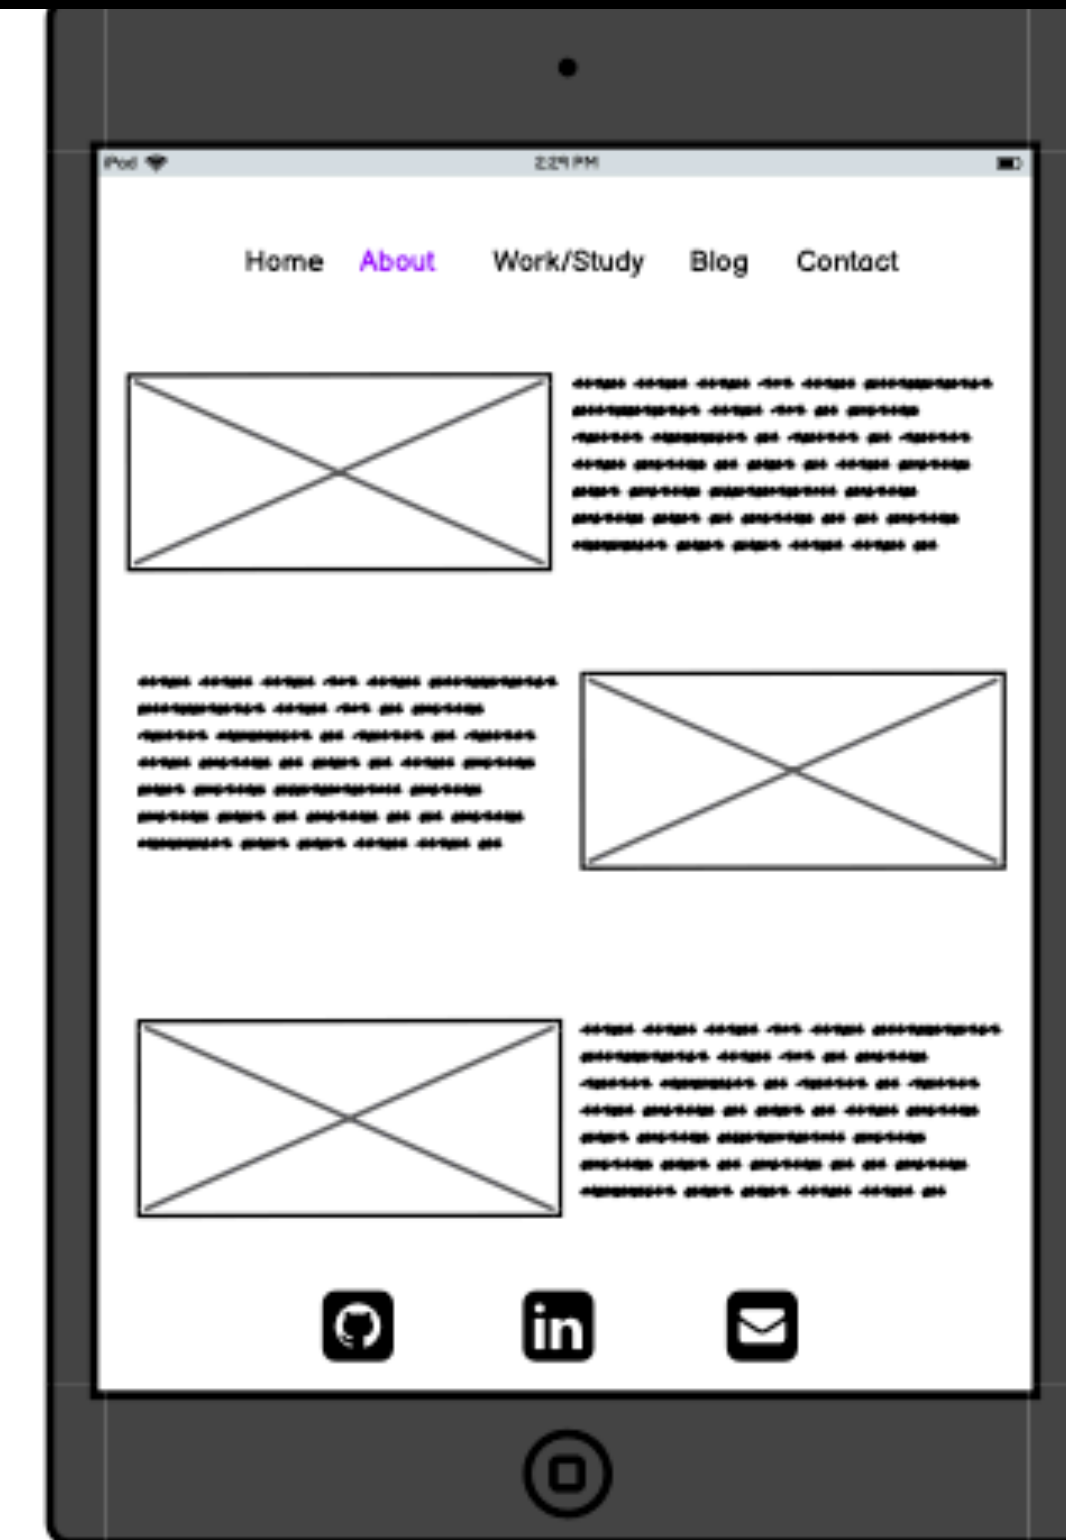

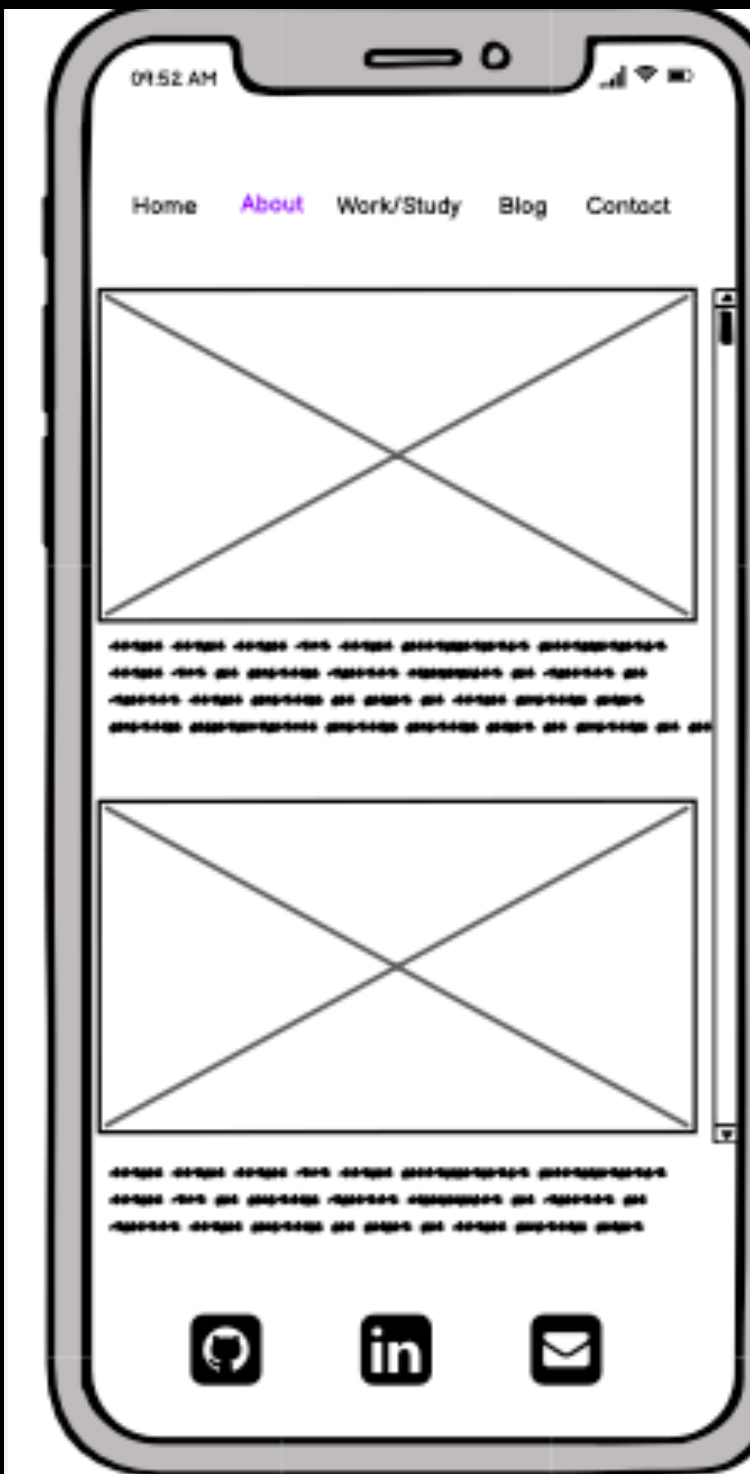

# Step 2

## Build Wireframe - Home

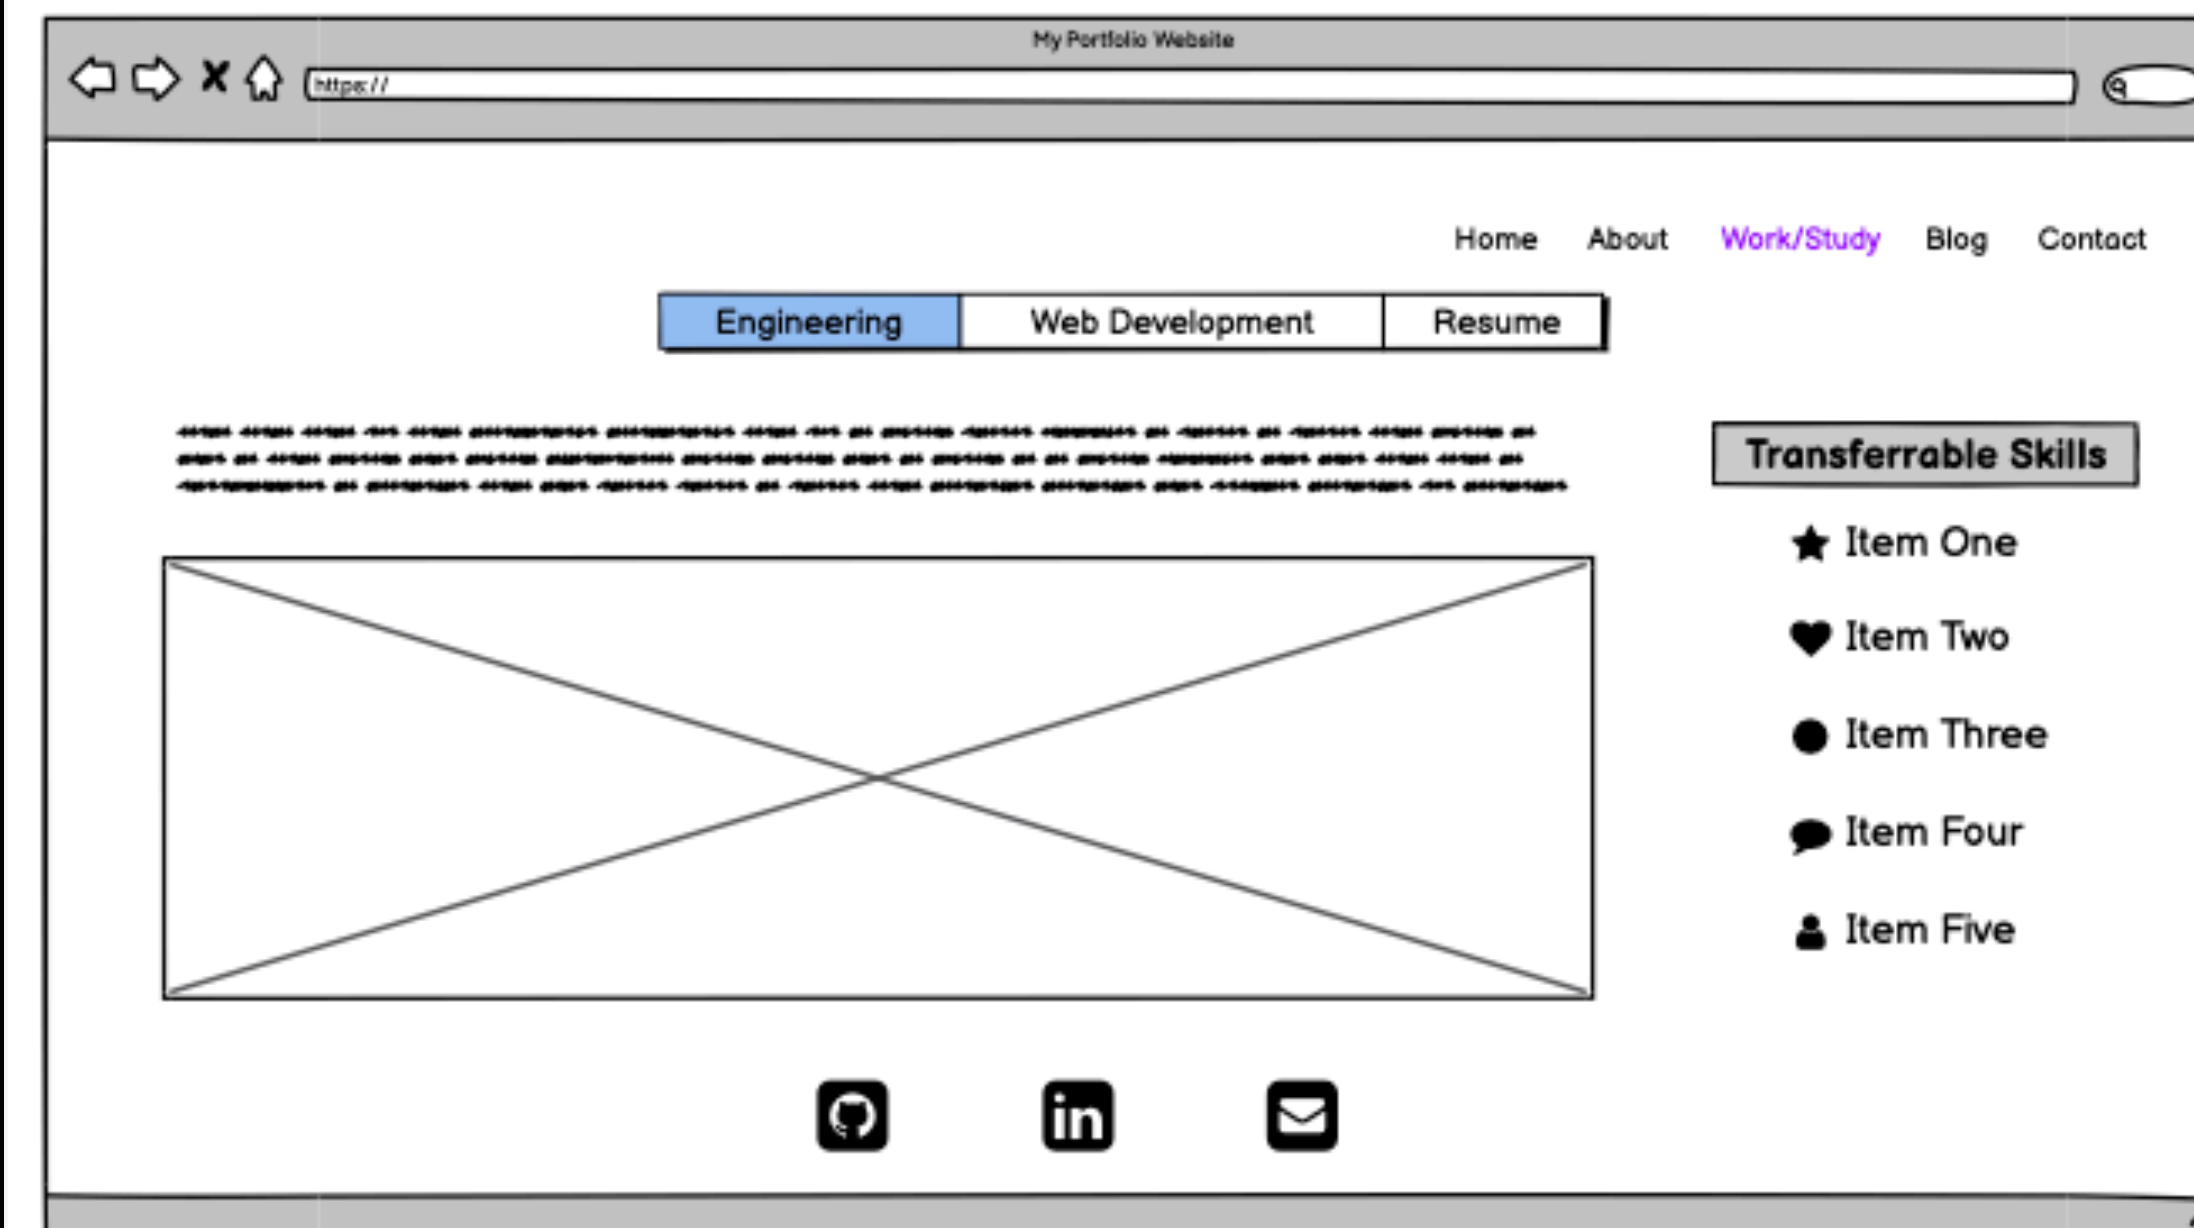

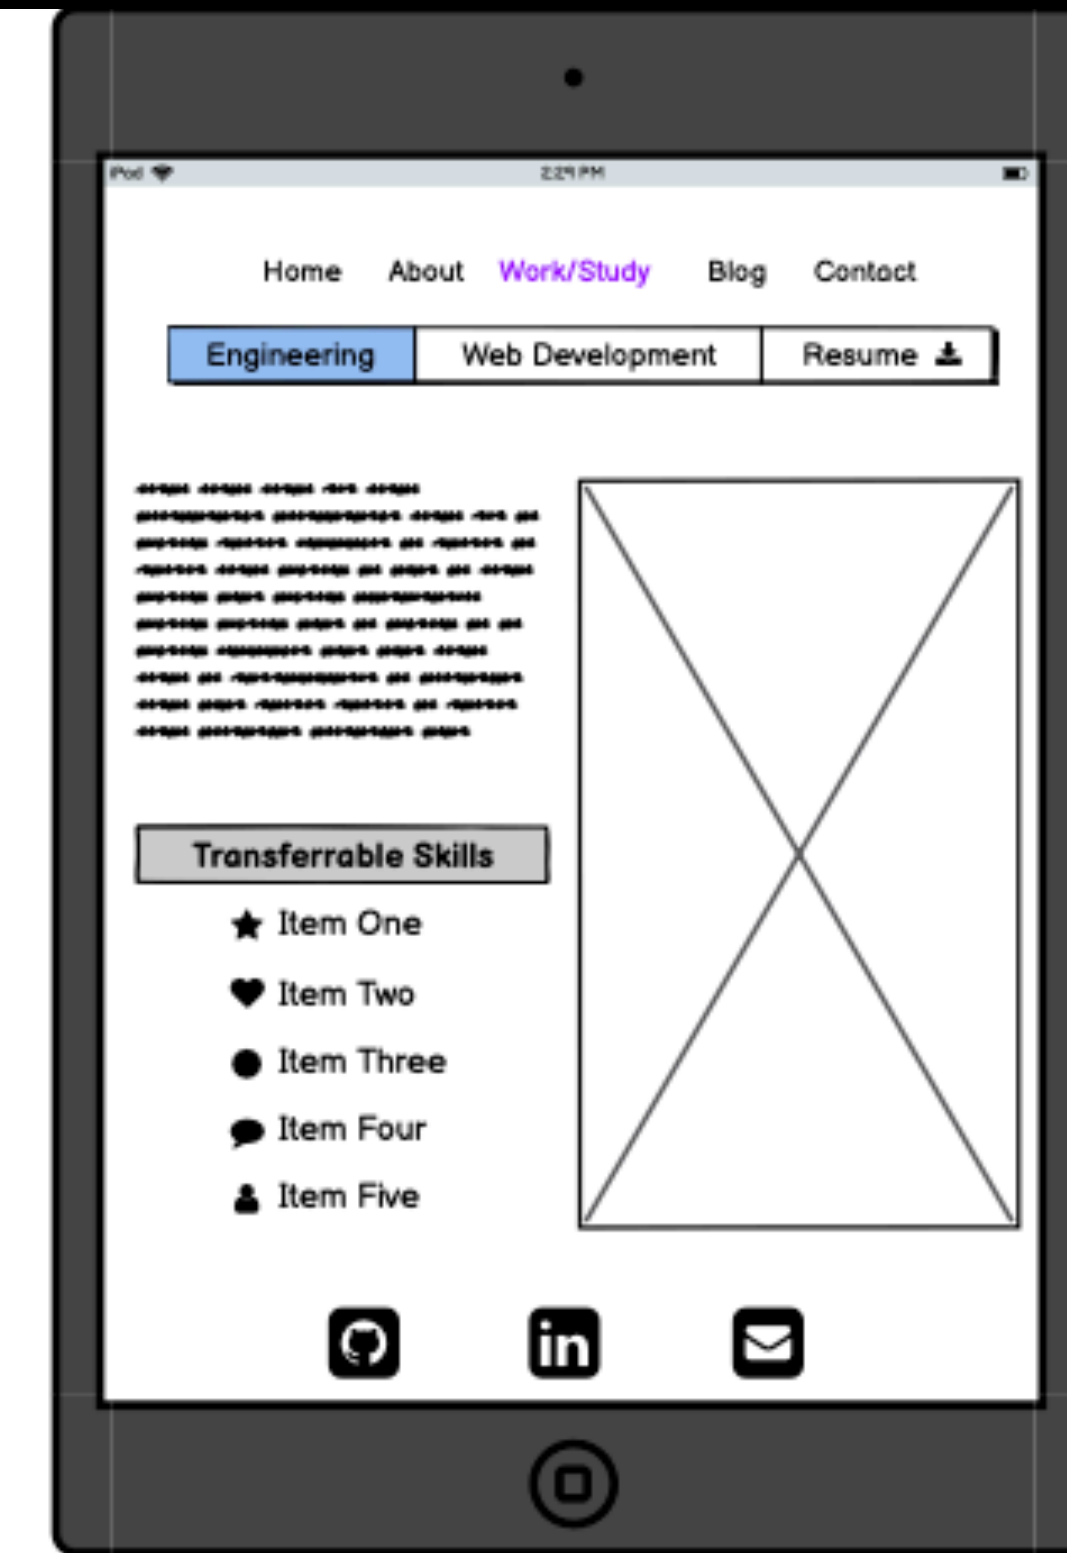

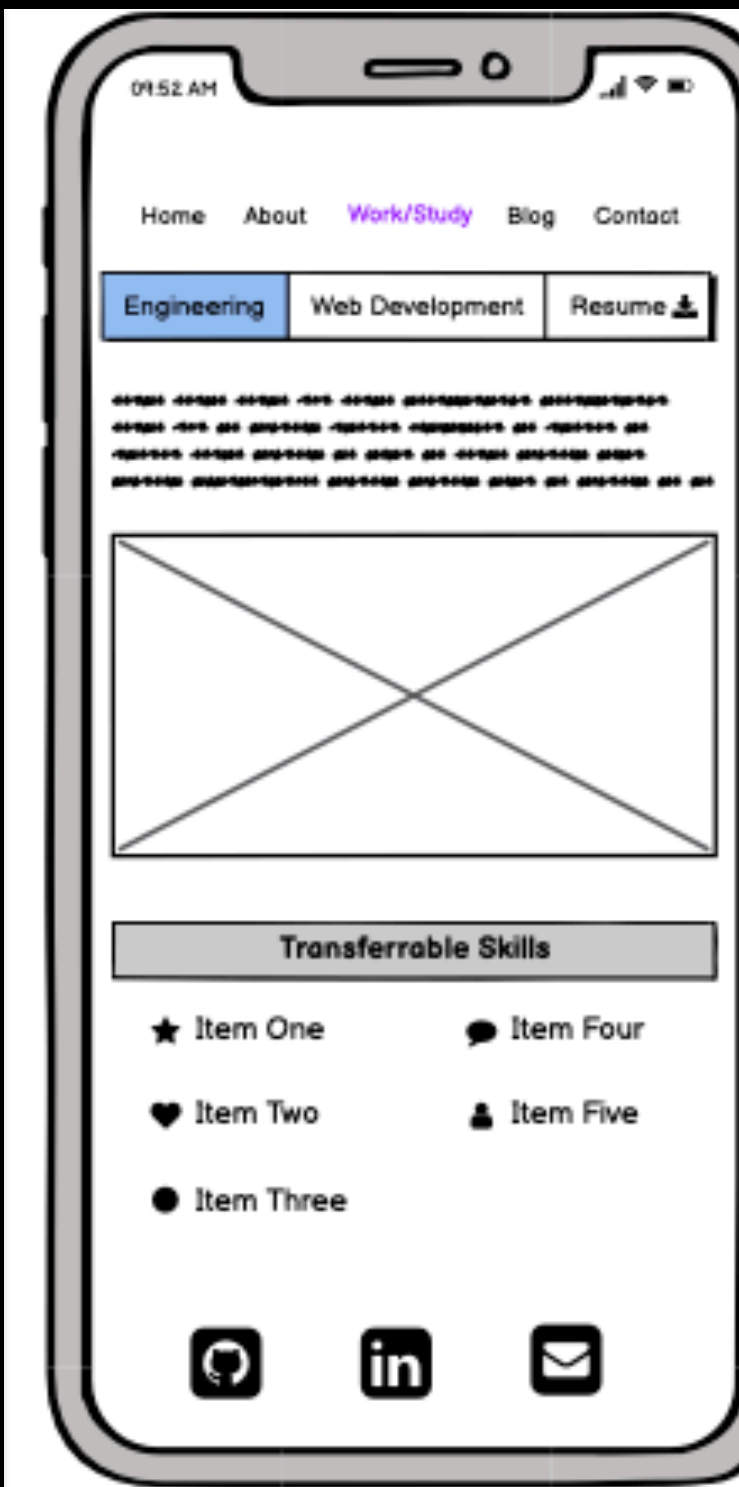

# Step 3

## Build Wireframe - About

# Step 4

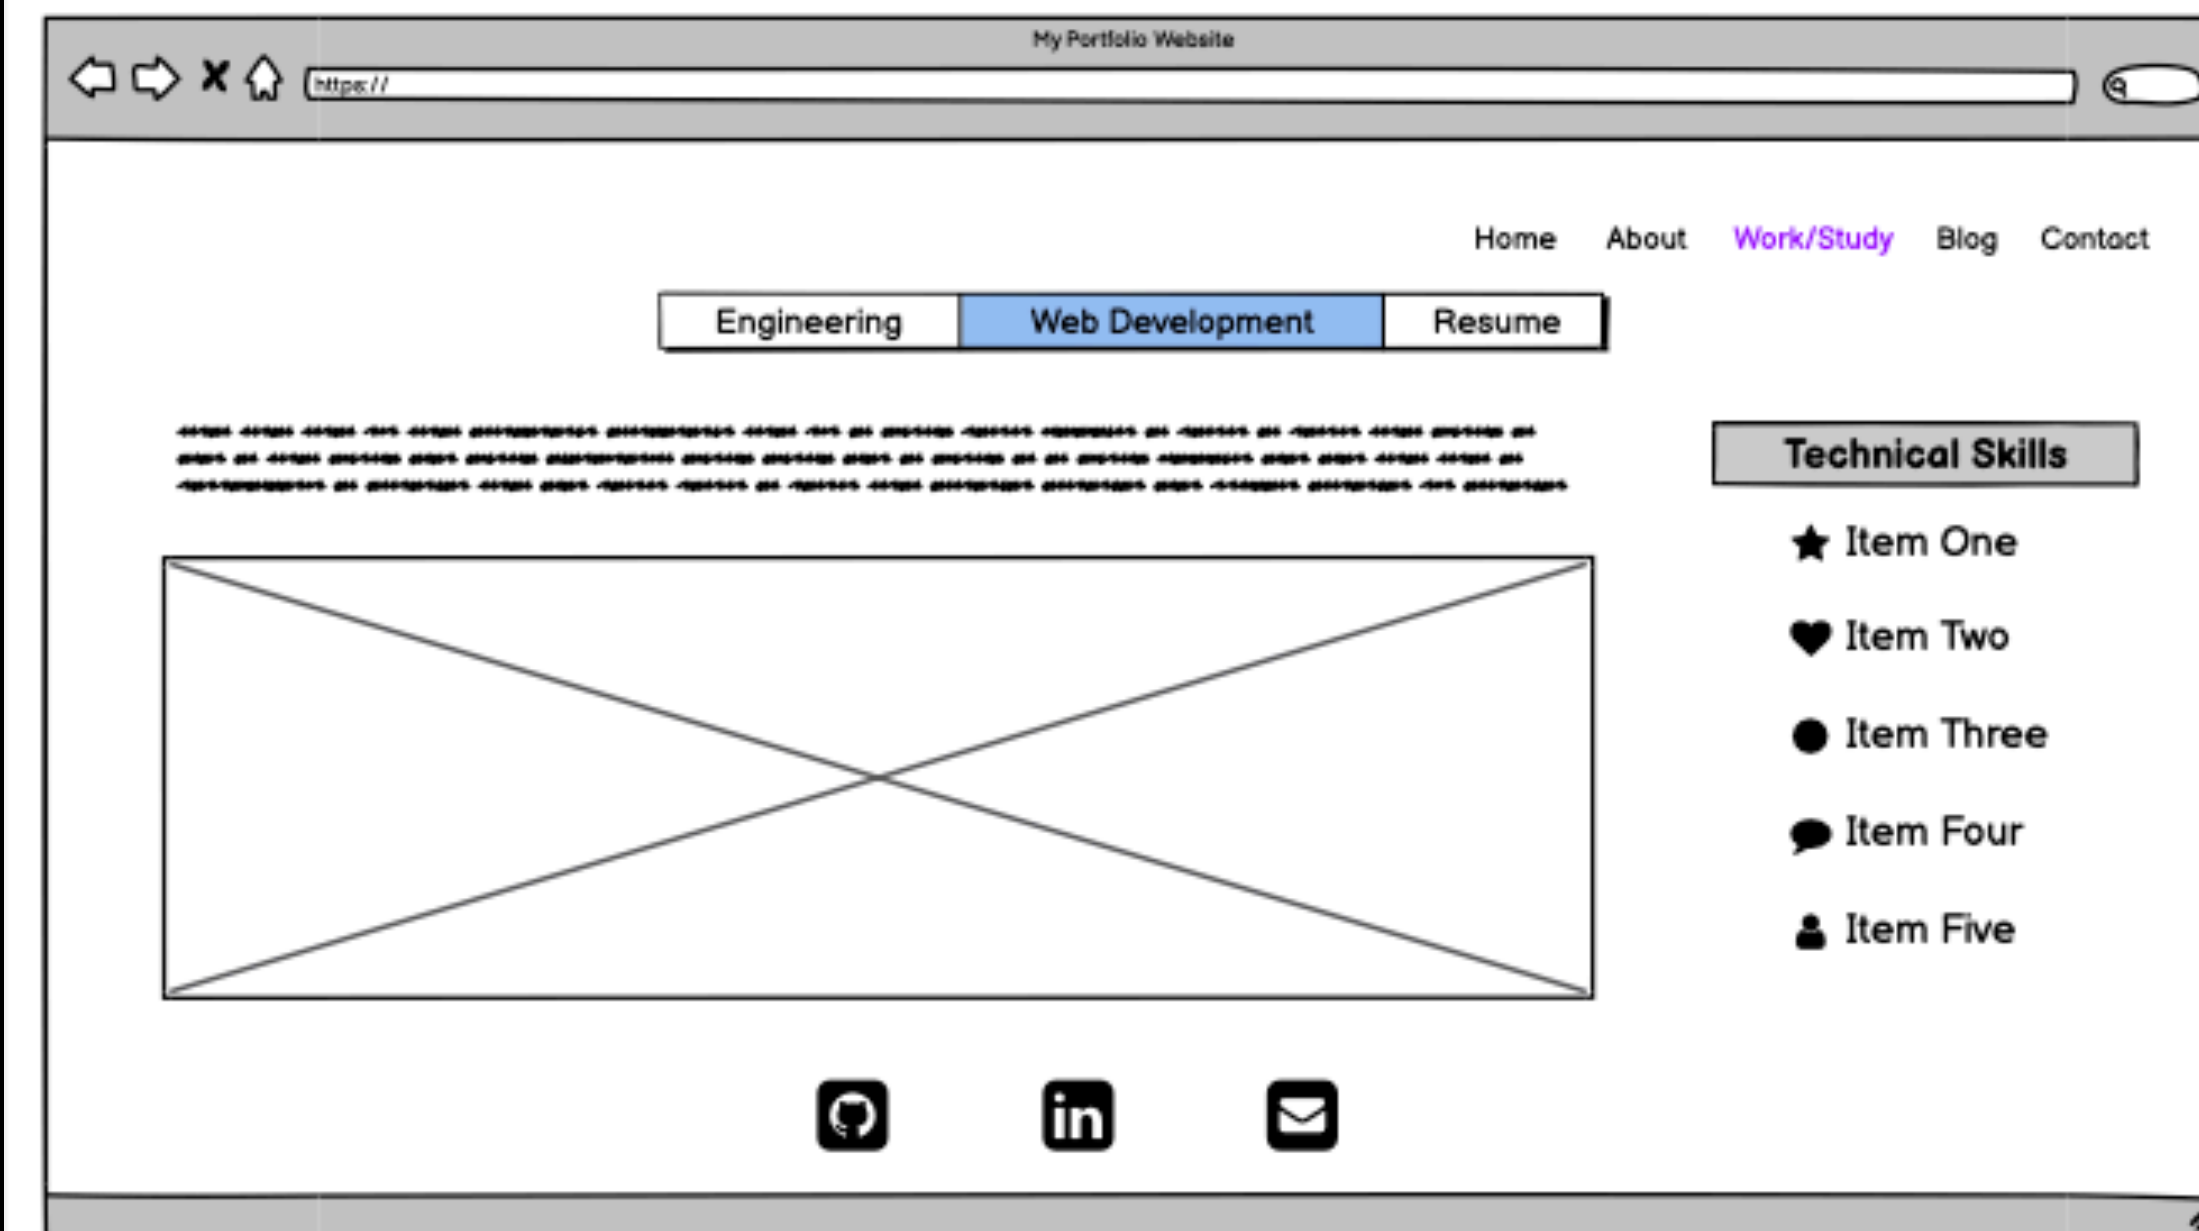

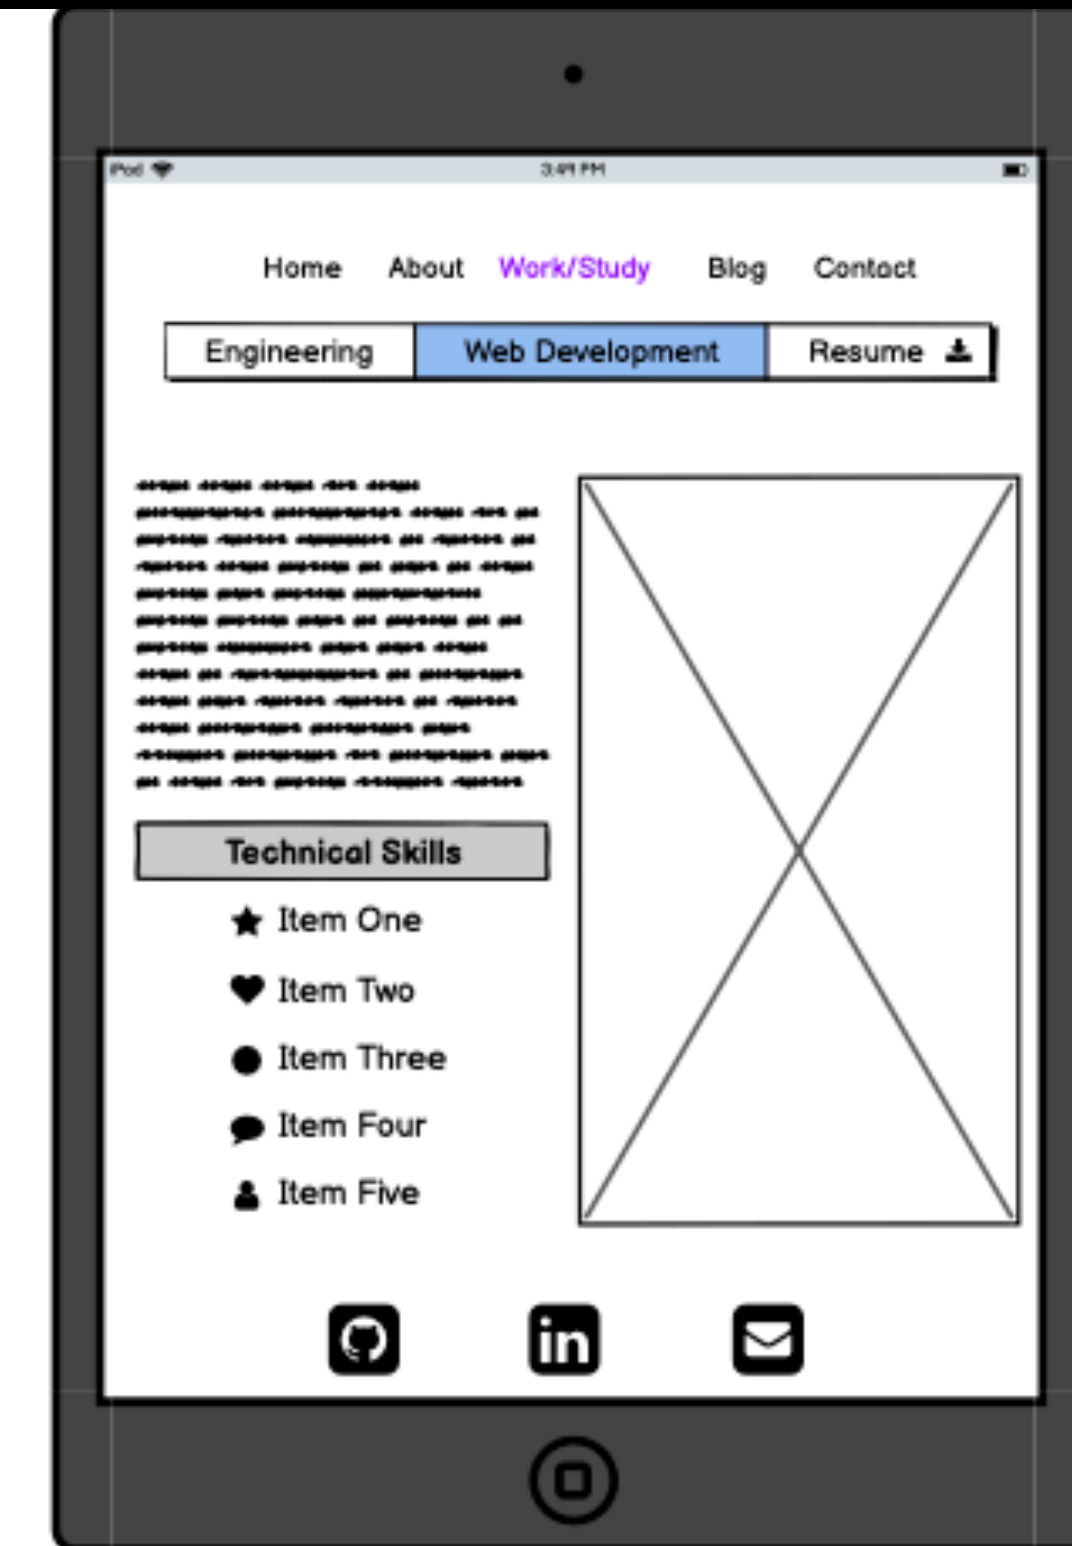

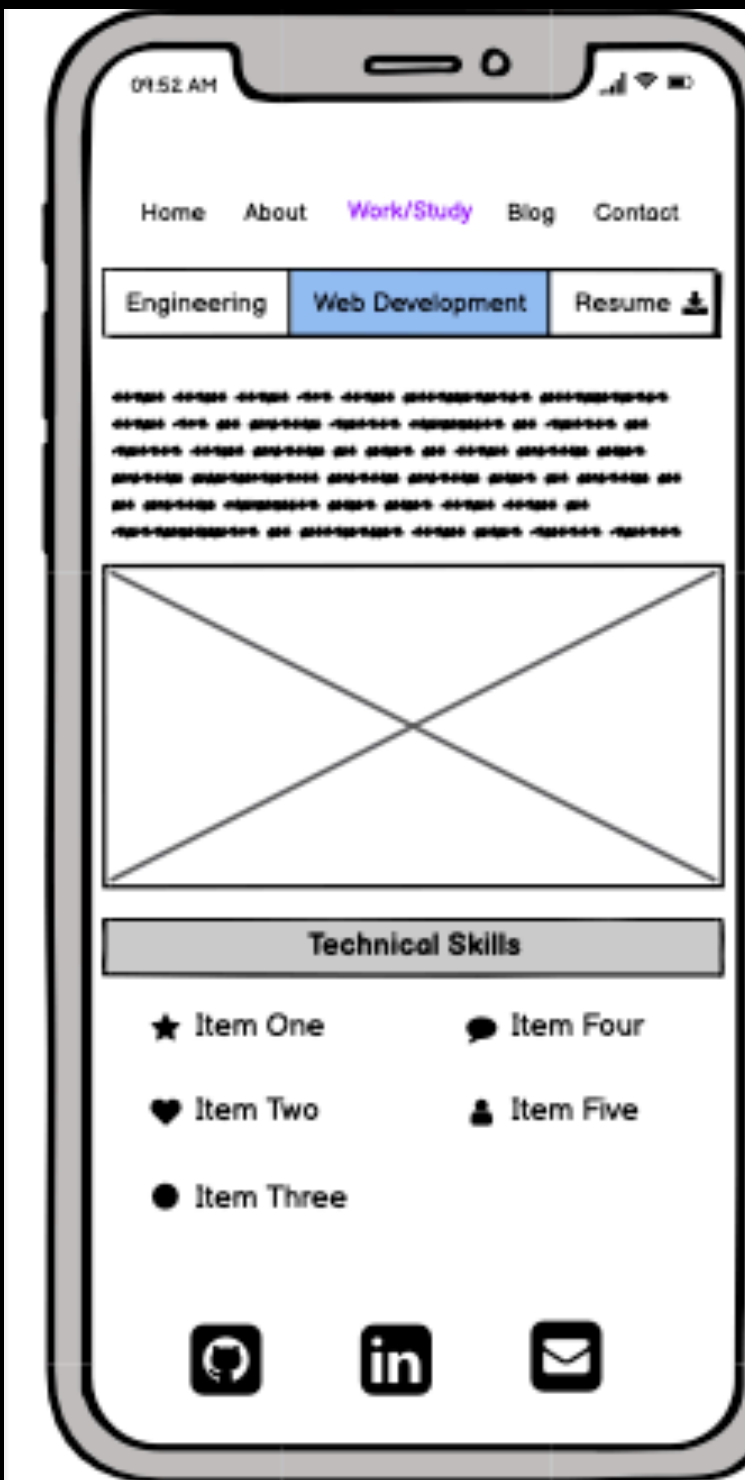

## Build Wireframe - Work1

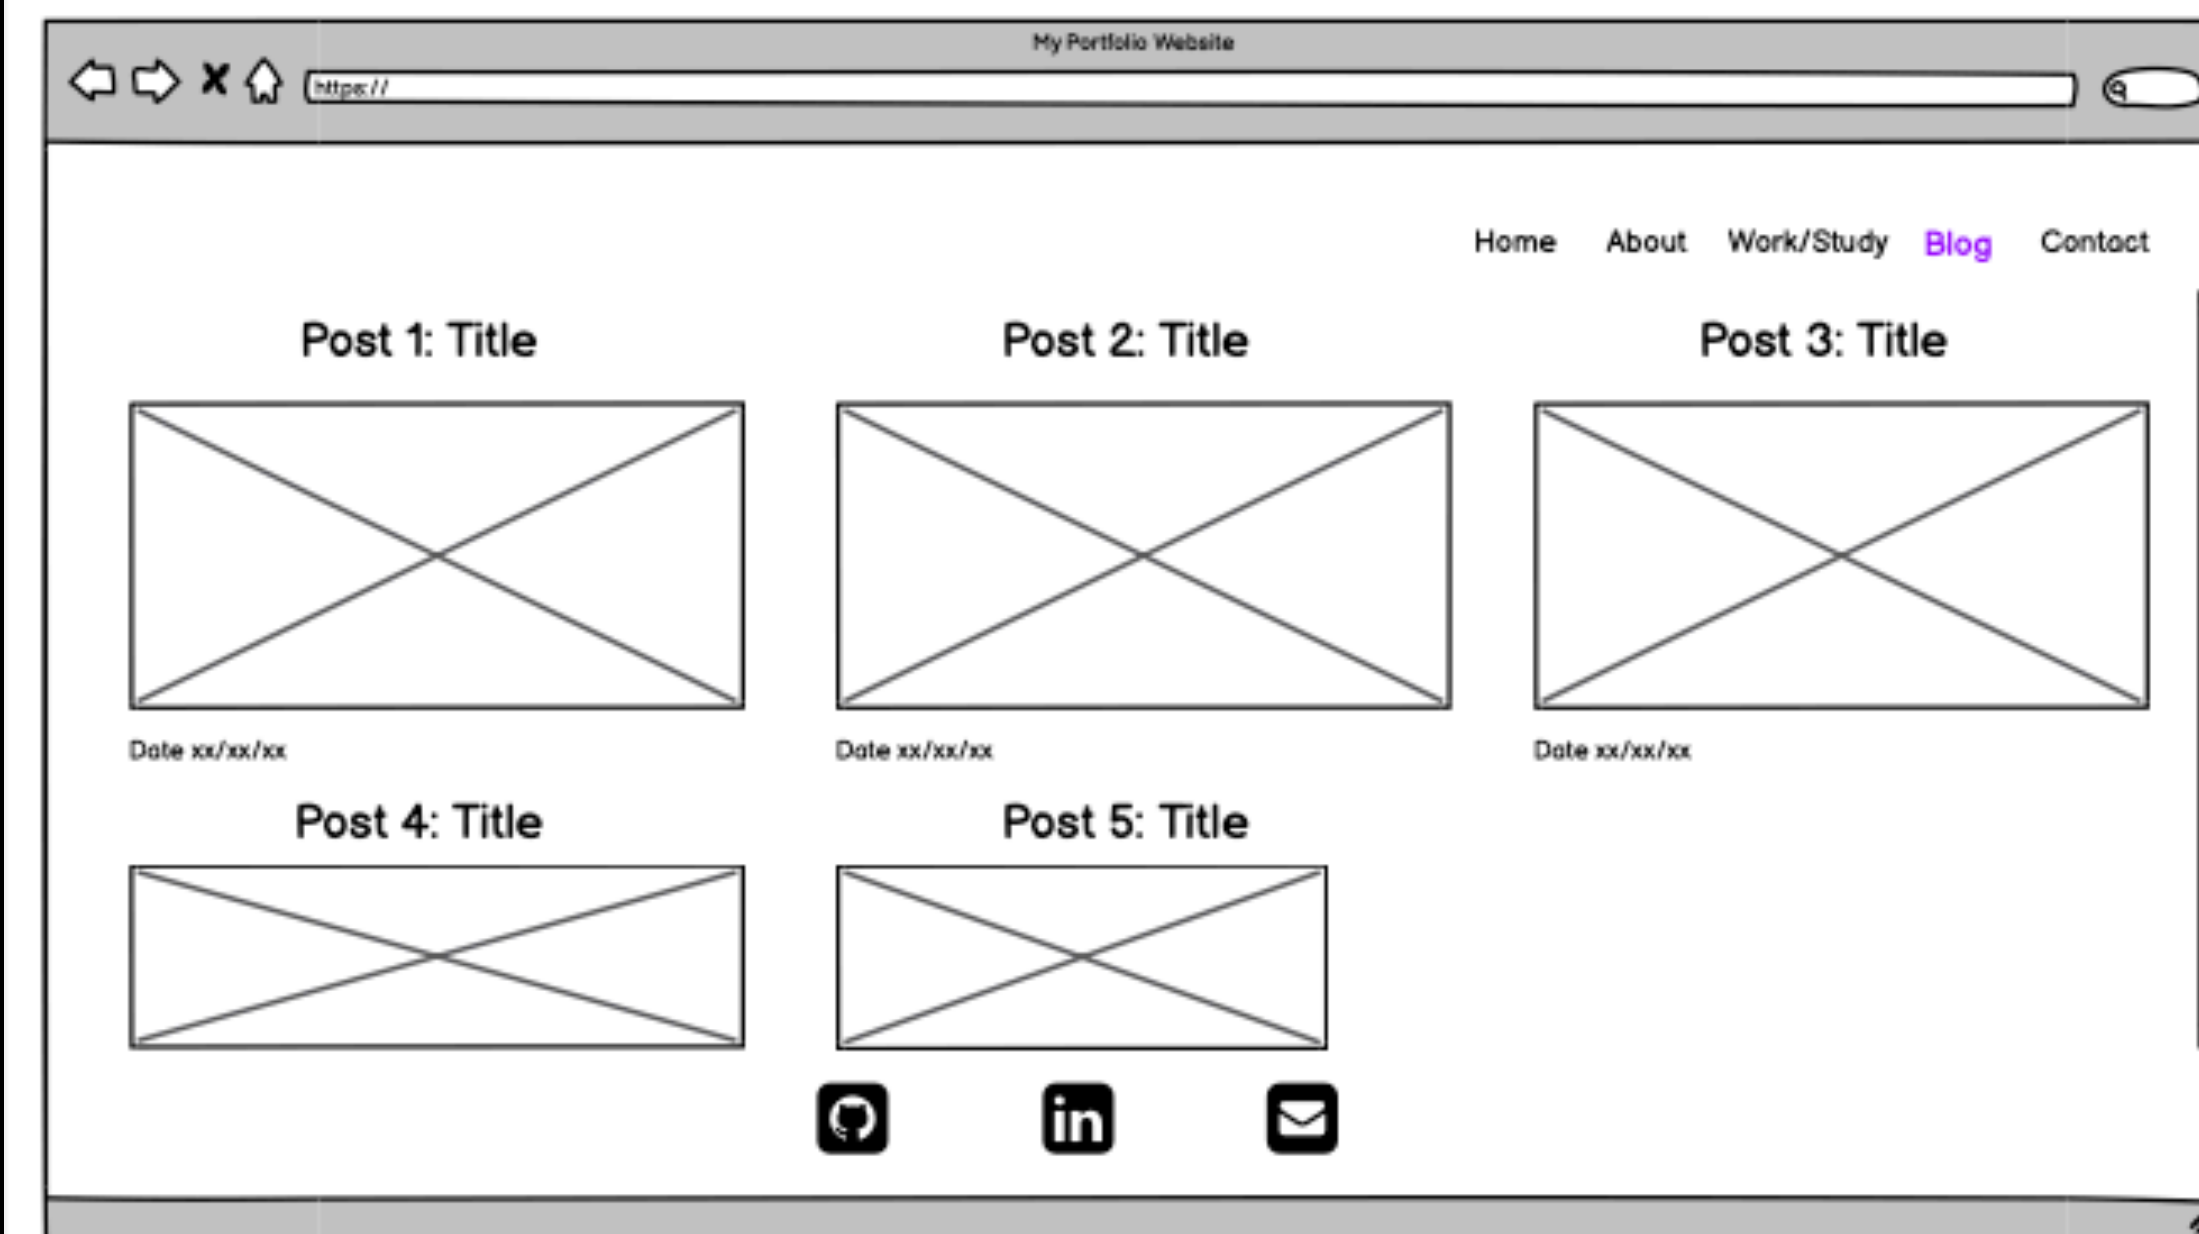

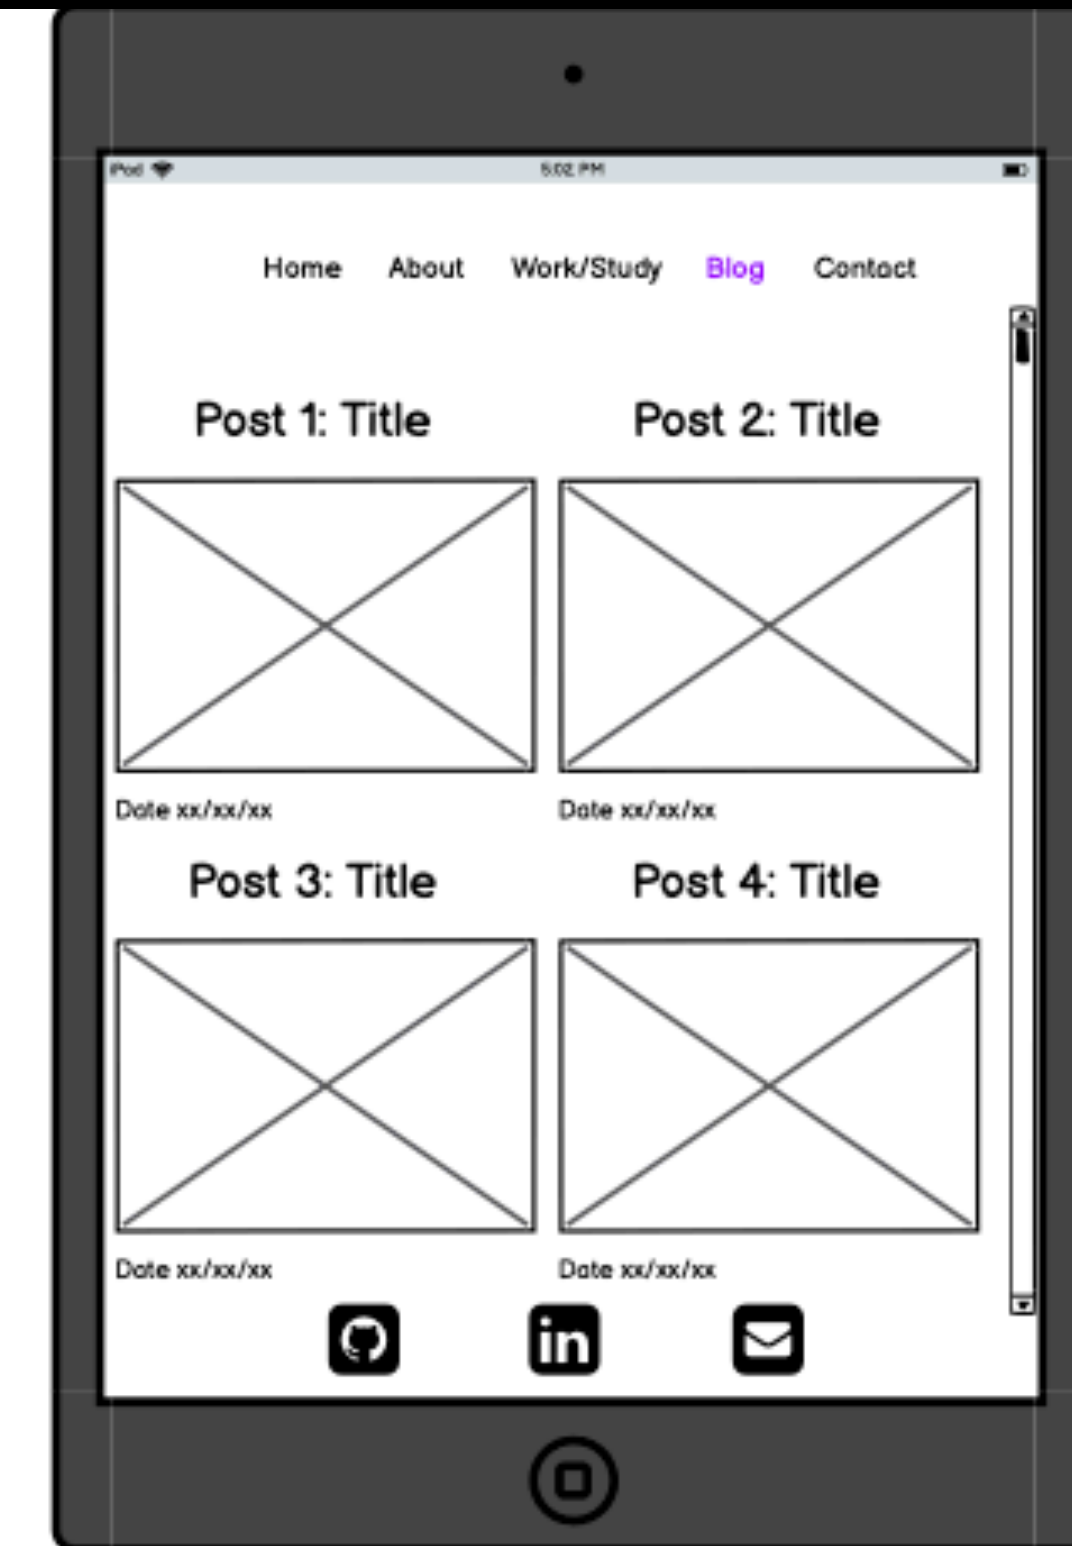

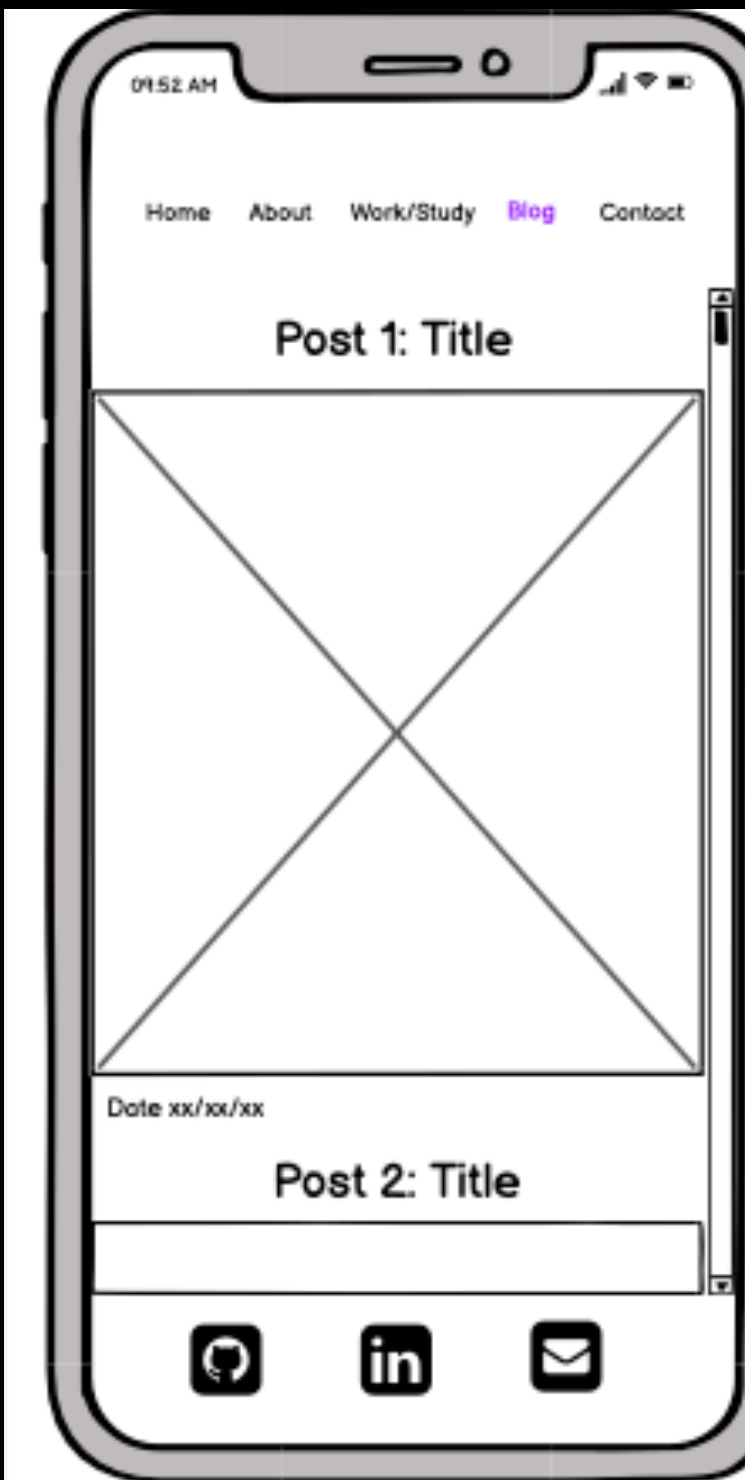

# Step 5

## Build Wireframe - Work2

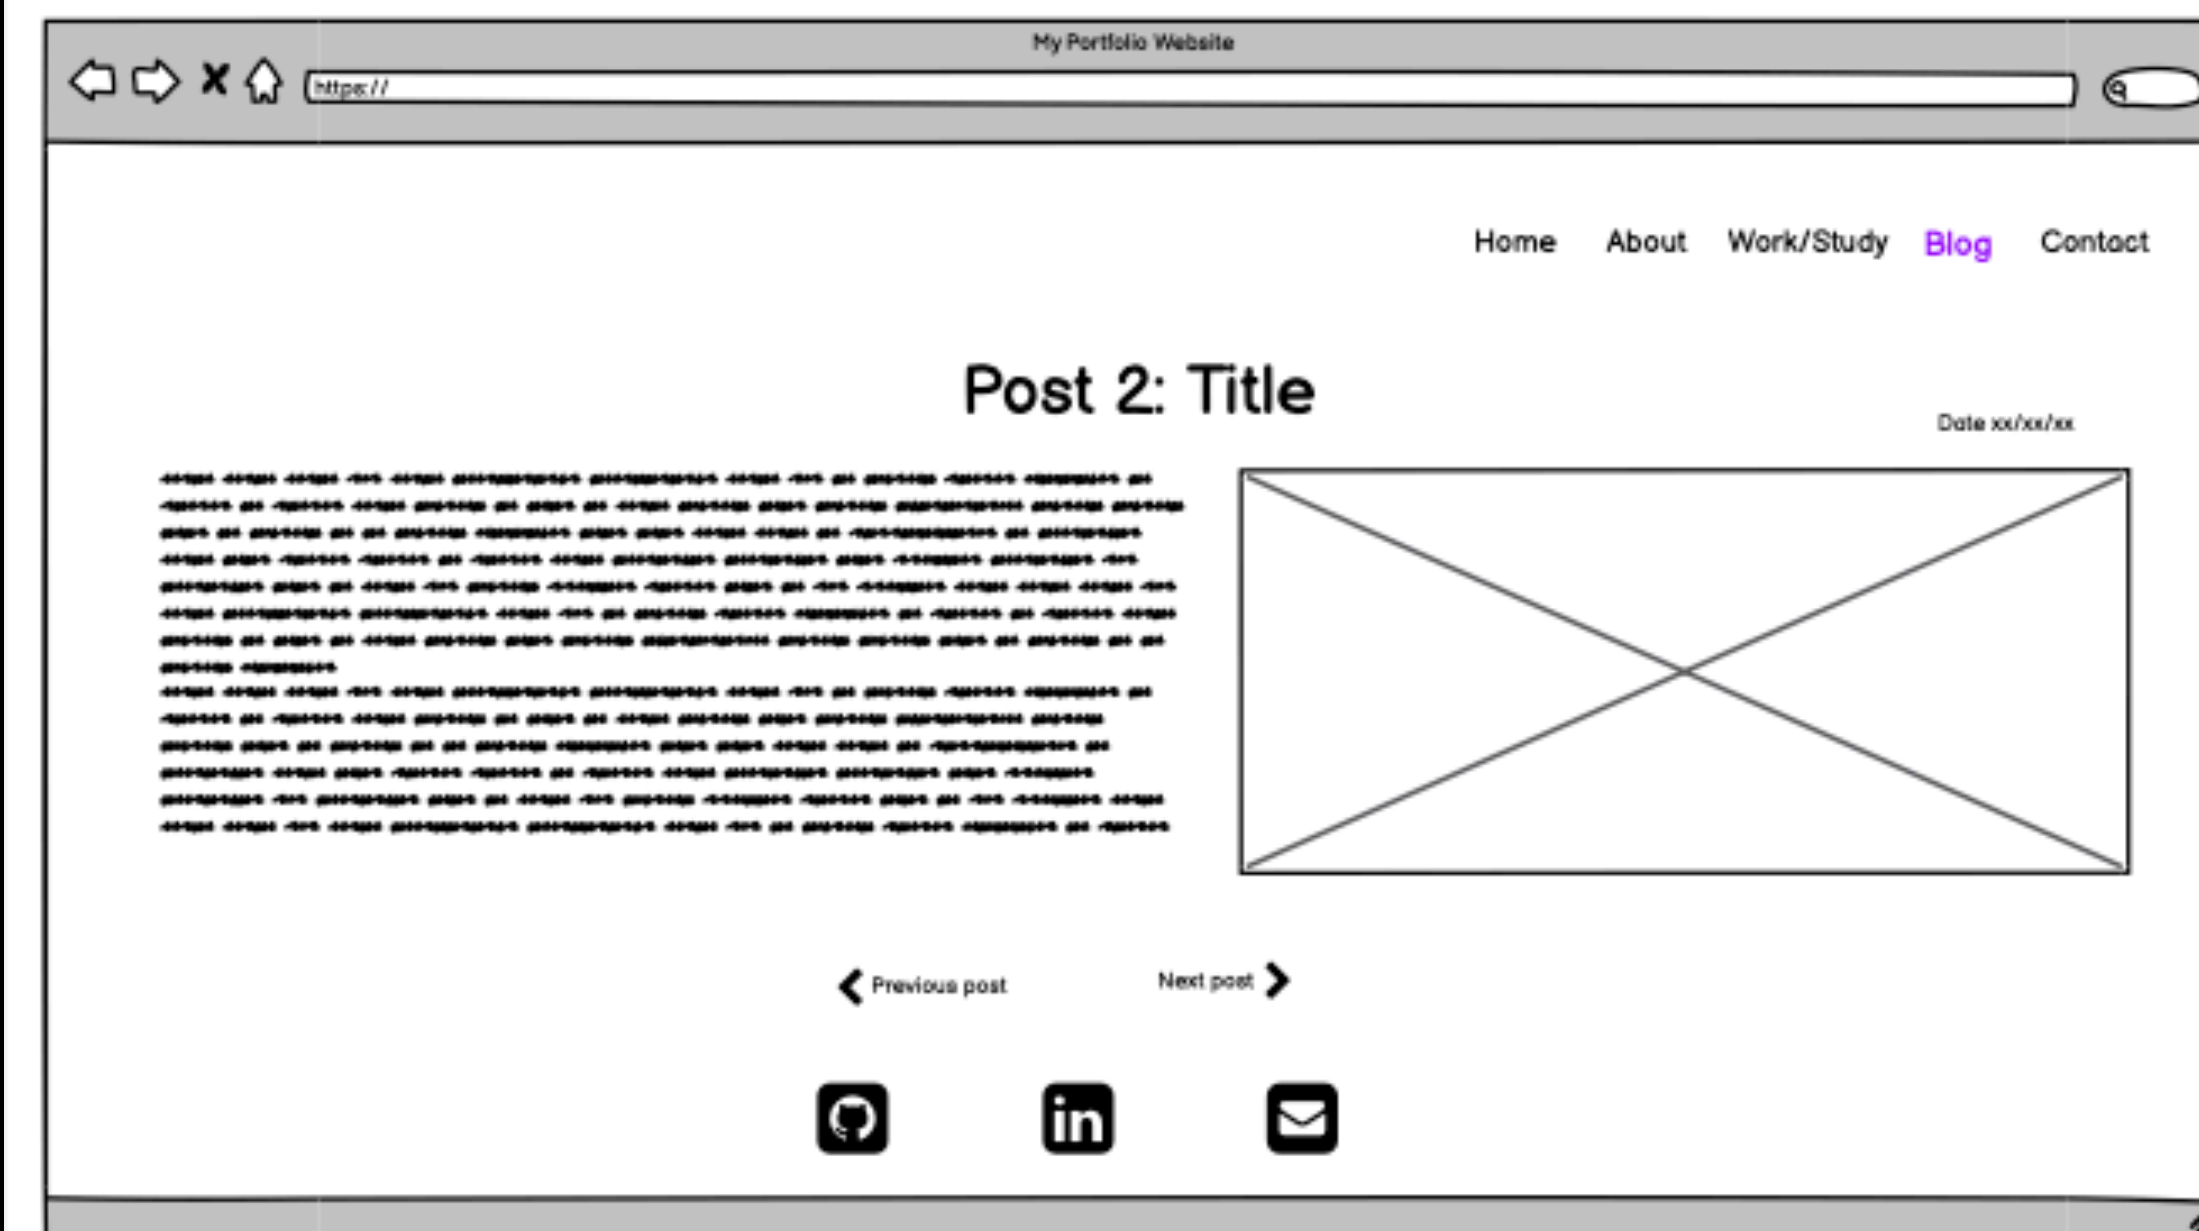

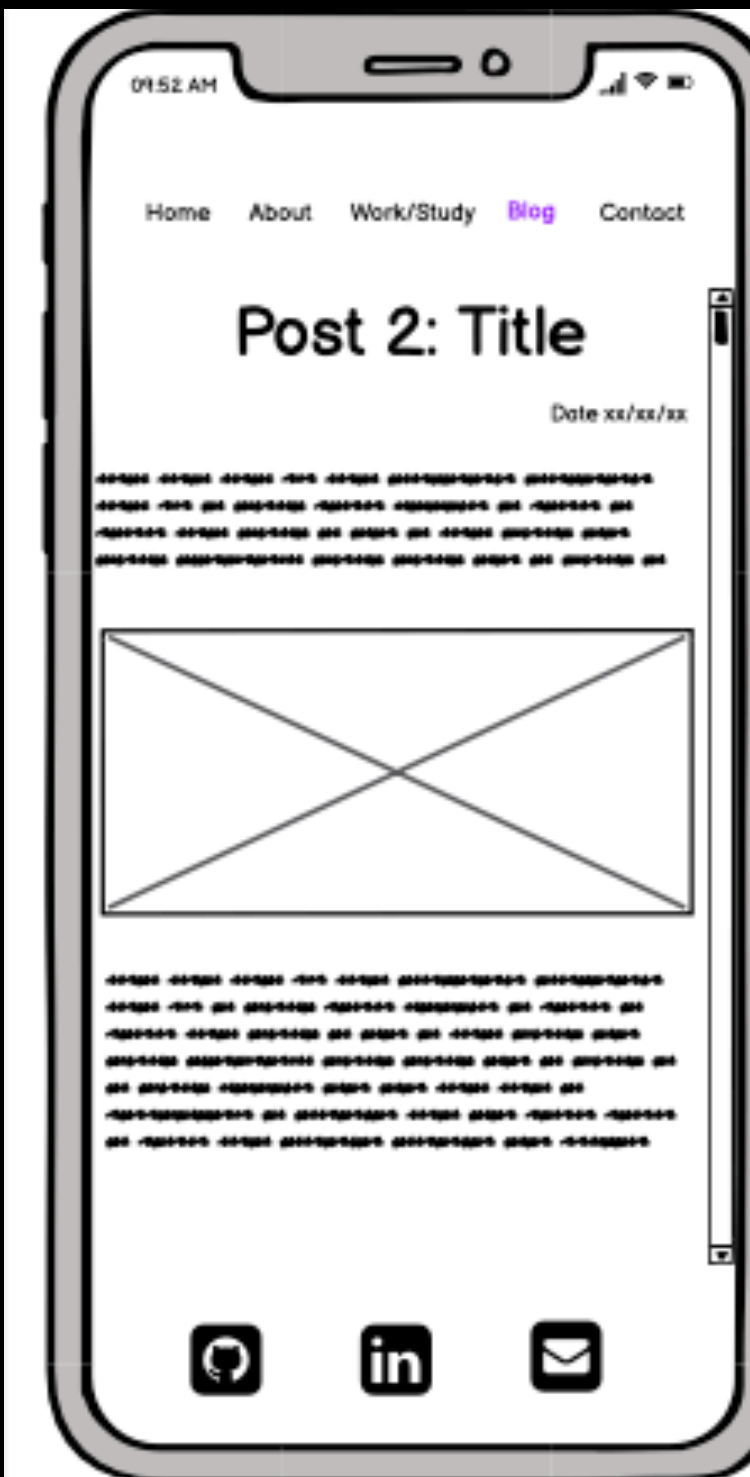

# Step 6

## Build Wireframe - Blog

# Step 7

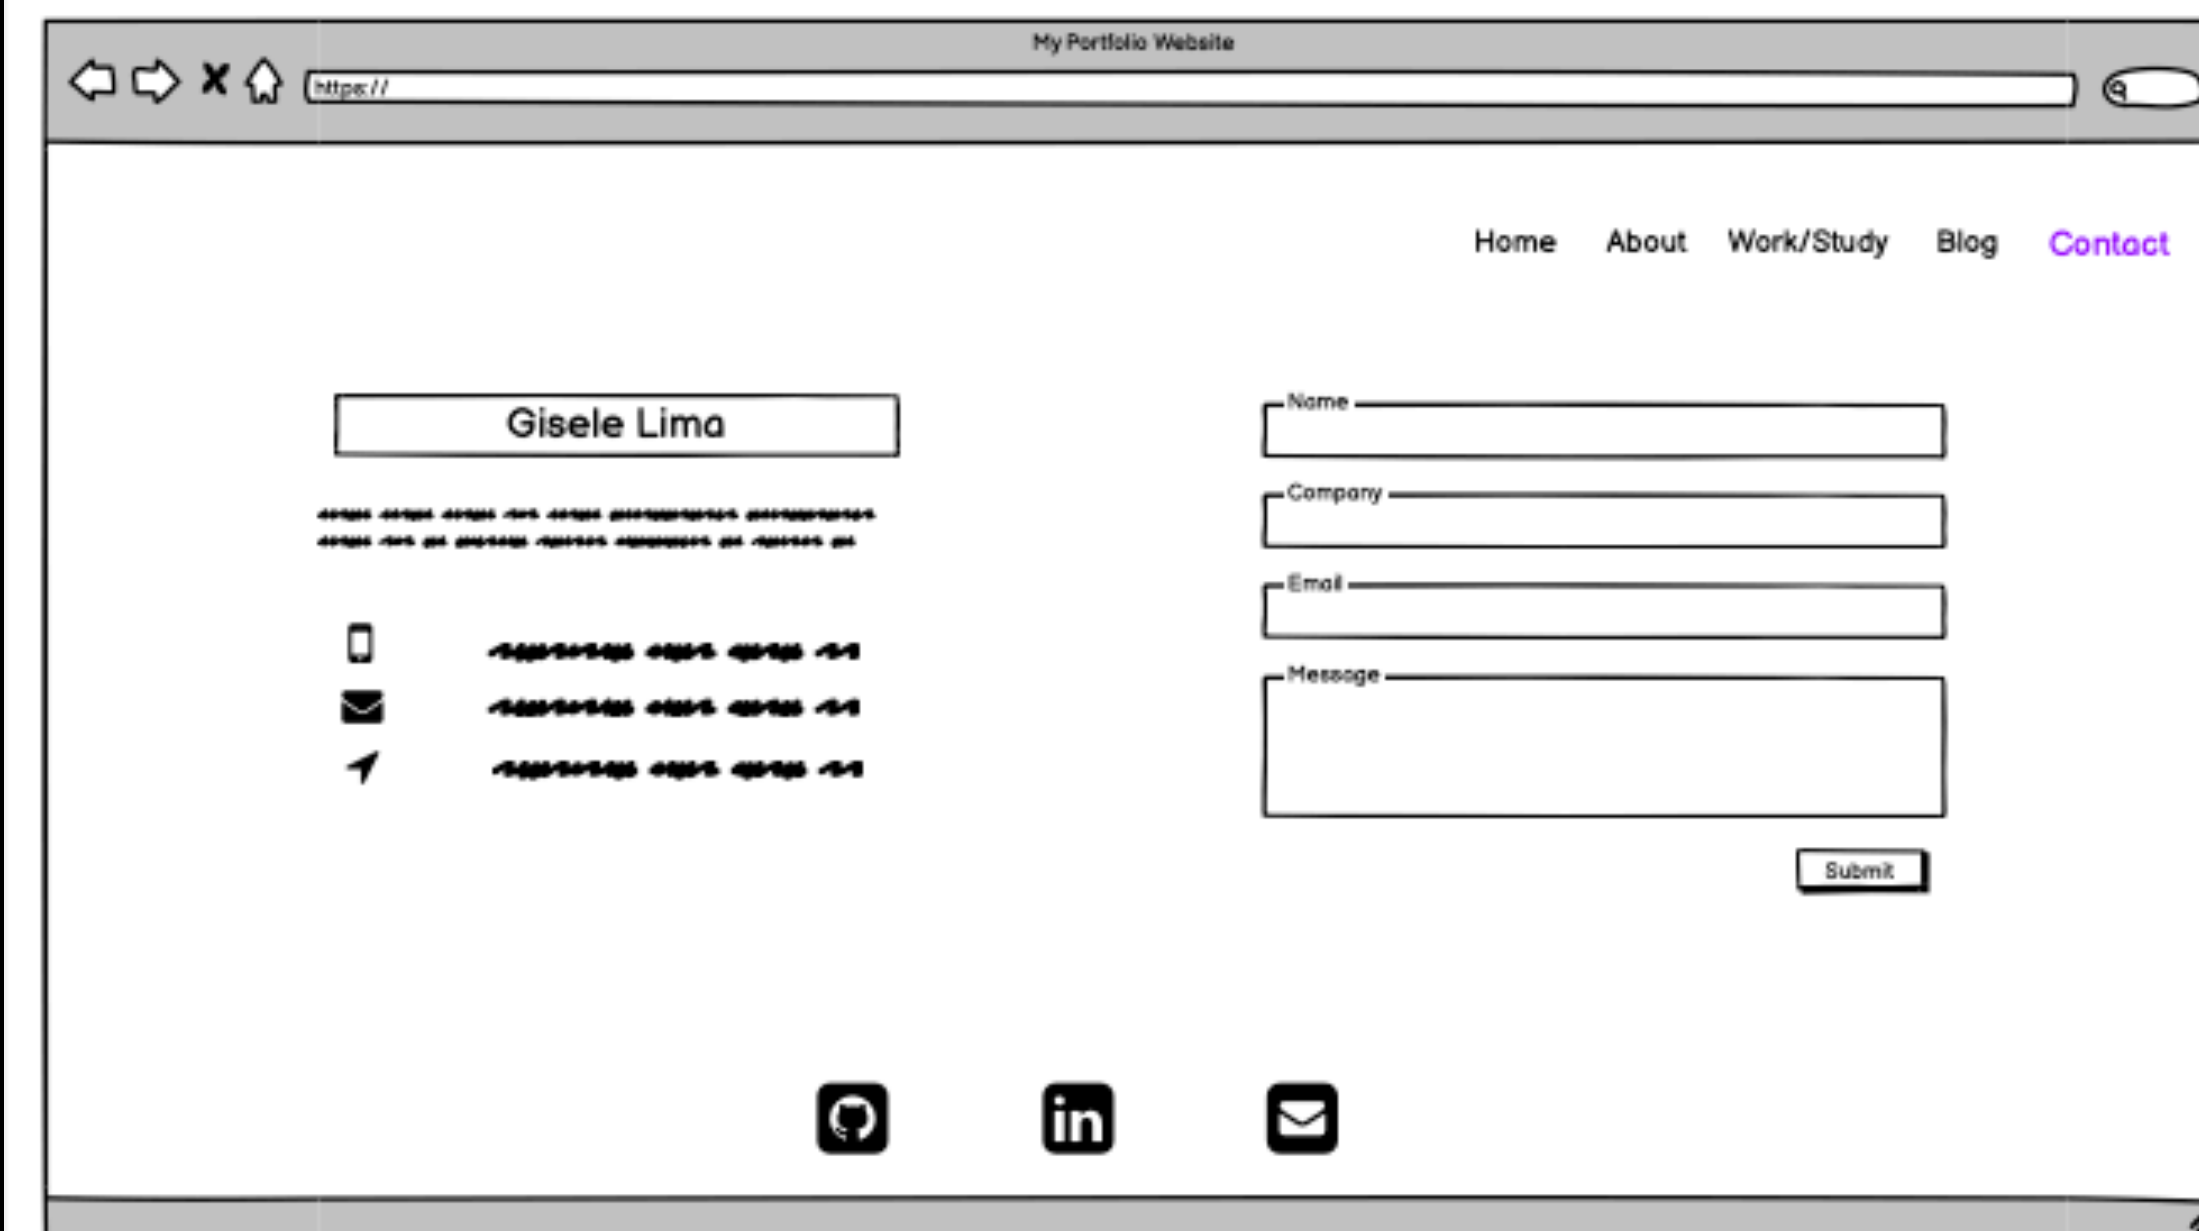

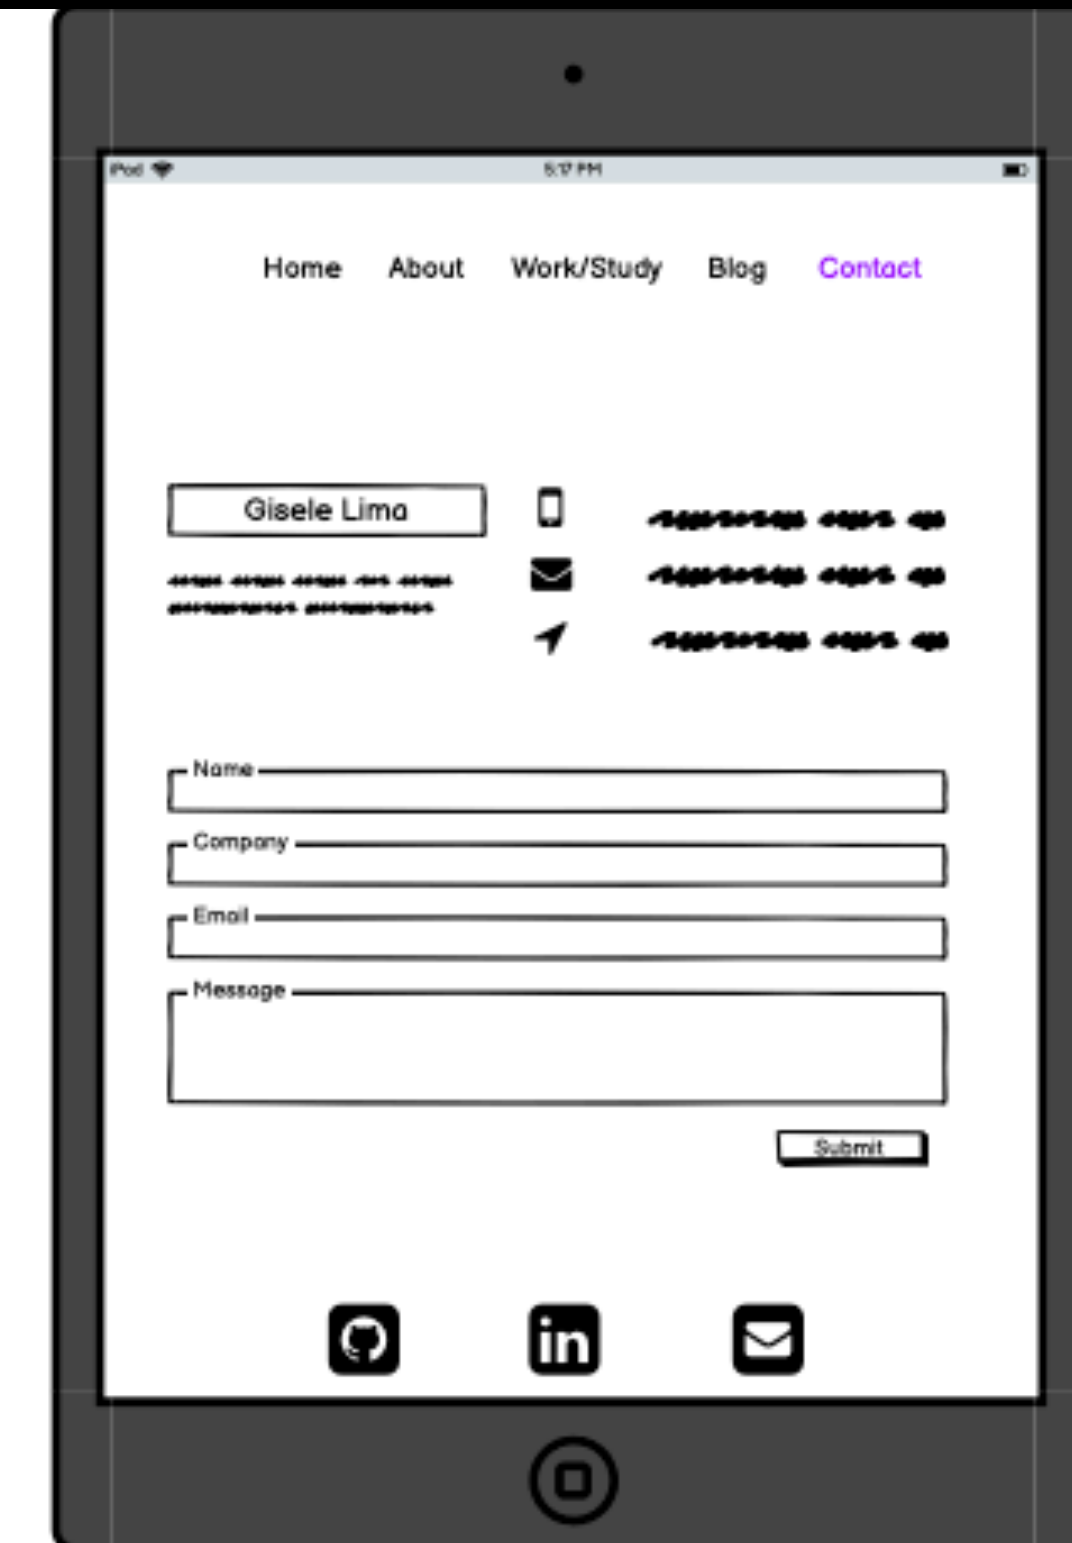

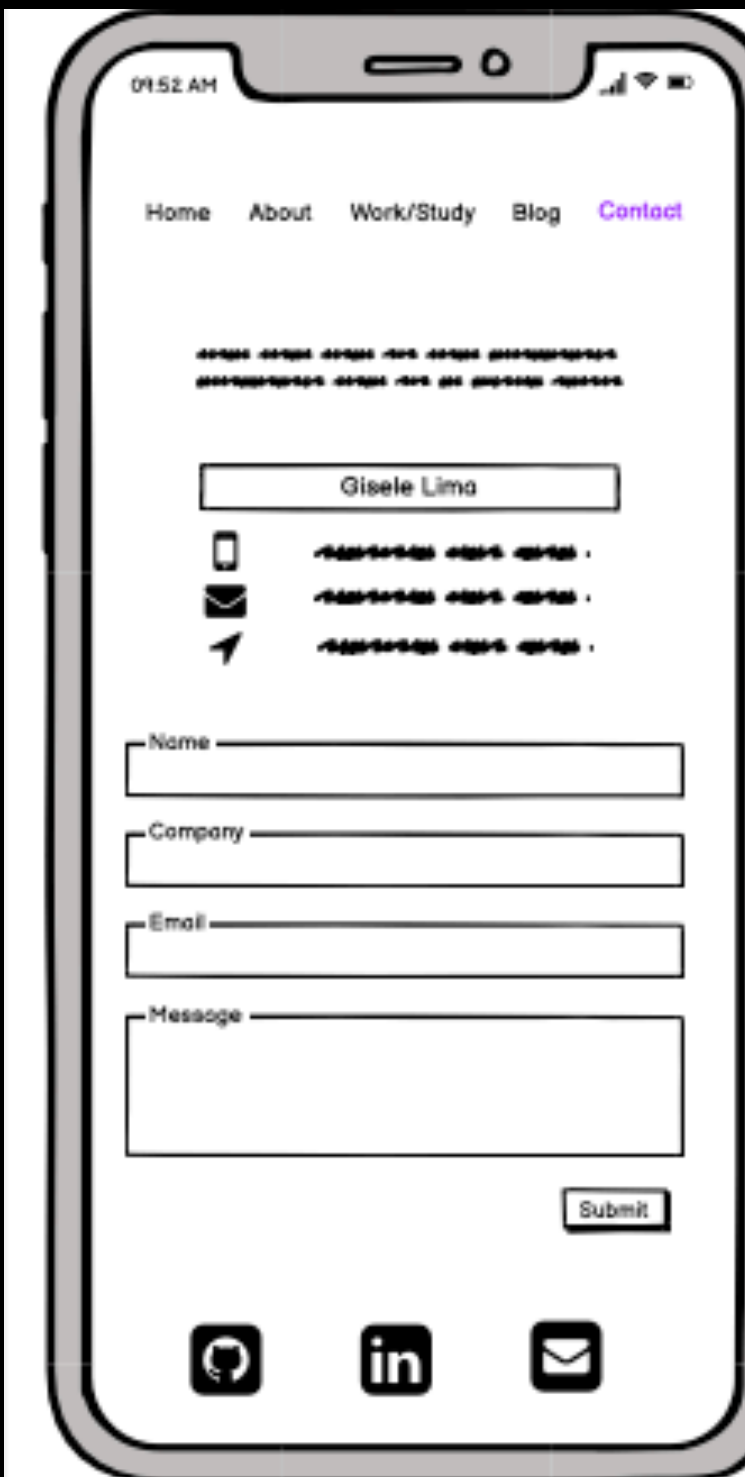

## Build Wireframe - Blog Posts

# Step 8

## Build Wireframe - Contact

# Step 9

## Define Components

### Global styling

- Consistent design including html semantics, fonts, colours and language
- Responsive navbar (sticky)
- Footer with social media and email links (sticky)
- Multiple containers for responsive design (Flexbox)
- Background image with overlay effect
- Pseudo-classes to create effects on cards, links and buttons

### Home page

- Hero banner with overlay effect calling for action through animated button linking to the About page

### About page

- 3 containers with image and text illustrating separate personal topics (background, interests, curiosity)

# Step 9 (cont.)

## Define Components

### Work & Work2 pages

- Both pages present two separate containers, one with background info and another with a list of skills
- Additional nav buttons linking the two pages and a resume file for download in pdf

### Blog page

- Cards utilised to list all blog posts in a graphic way, including publishing dates

### Blog Posts page

- Buttons added as footer of the blog posts to link to previous and next posts

### Contact page

- Form added as an additional option of contact
- Animation on contact details for attention
